## How to change Fridge Fan

1. Pull Fridge out from it's current position. Turn the fridge around and inspect the back side components. Unplug Fridge. Notice the **TWO BLACK WIRES** plugged into socket plug. Unplug these two wires, and unstrap them from wire strap.

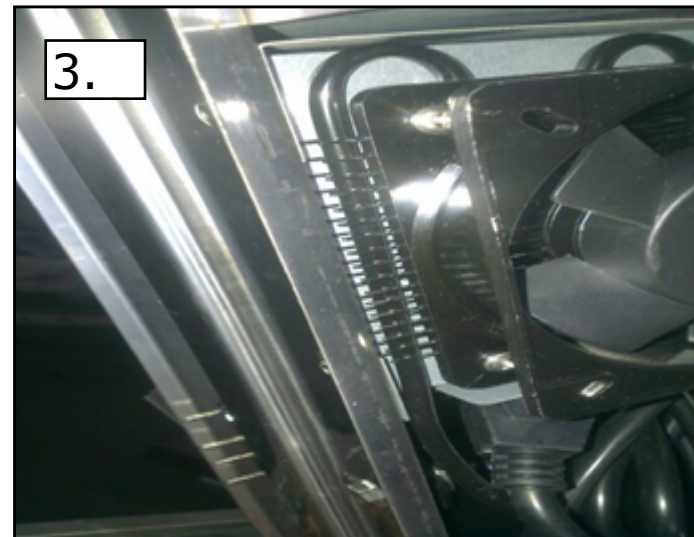

2. Tilt the fridge back against wall, Do not turn fridge on it's side! Notice Metal Panel on underside, the fan is attached to this panel. Unscrew the two connecting screws from metal panel, to unhinge fan. Now Replace with new one using same screws.

## Outdoor Rated Fridge Item No. FR401

3. Place the new wires back into socket, were you removed other wires, and you are done.
